KEY SKILLS

Core Frontend - React.js - JavaScript - TypeScript - HTML5 - CSS3

React - React Hooks - React Router - Redux - Redux Toolkit - Context API - React.js Development - Custom Hooks

API / Data - REST API - RESTful Web Services - Axios - API Integration

Performance - Frontend Performance Optimization - Code Splitting - Lazy Loading - Virtualization - Memoization - Debouncing

Tools - Vite - Webpack - Git - GitHub

Cloud / CI-CD - AWS - Amazon S3 - AWS CloudFront - CI/CD - GitHub Actions

UI - Responsive Web Design - Responsive Design - Cross-Browser Compatibility - Tailwind CSS - DevExtreme

Framework - Next.js

OTHER PERSONAL DETAILS

PROFILE SUMMARY

Frontend Developer with 4.7+ years of experience building scalable, responsive, and high-performance enterprise web applications using React.js, JavaScript, TypeScript, Redux Toolkit, Context API, HTML5, and CSS3. Experienced in developing reusable React components across multiple ERP modules and optimizing data-intensive interfaces handling 80K+ records using virtualization, memoization, lazy loading, and code splitting. Strong experience with REST API integration, React Hooks, React Router, Vite, Webpack, responsive design, cross-browser compatibility, and frontend performance optimization.

EDUCATION

2021 — B.C.A.
Kanpur University

2018 — XIIth
Hindi

2016 — Xth
Hindi

WORK EXPERIENCE

Nov 2025 - Present — React Developer
Sofgen ERP

- Developed scalable ERP applications using React.js, JavaScript, and TypeScript across **6 business modules**, including Purchase, Sales, Material Management, Finance, Payroll, and Reporting.
- Optimized DevExtreme DataGrid performance for **80K+ records** using virtualization, memoization, and optimized rendering techniques.
- Implemented **300ms debouncing** for search and filtering interactions to reduce unnecessary API requests and improve UI responsiveness.
- Integrated REST APIs using Axios and developed reusable API utilities and custom hooks for consistent loading and error handling.
- Implemented lazy loading, React.lazy, Suspense, and code splitting to optimize frontend application performance.
- Used Redux Toolkit and Context API for state management across enterprise application modules.
- Developed responsive and cross-browser compatible interfaces using React.js, HTML5, CSS3, Tailwind CSS, and DevExtreme.
- Collaborated with cross-functional teams to troubleshoot issues, improve application stability, and deliver production-ready frontend features.

Apr 2024 - Oct 2025 — Software Engineer
American Epay Systems

City	Gurugram
Country	INDIA

LANGUAGES

- English
- Hindi

Designed and developed the Sentinel Dashboard from scratch using React.js, Next.js, TypeScript, and JavaScript.
Built reusable and scalable UI components to support multiple dashboard features and improve development consistency.
Developed responsive interfaces with maintainable frontend architecture and reusable component patterns.
Participated in code reviews, debugging, and implementation of frontend best practices to maintain code quality.
Collaborated with development teams using Scrum methodology to estimate work, track progress, and deliver features within planned timelines.

Apr 2022 - Apr 2024

Associate Software Engineer

American Epay Systems

Write, test, and maintain efficient and reliable code under the guidance of senior engineers. Collaborate with team members to design and develop new features or applications. Participate in coding reviews and adhere to coding standards and best practices. Authored code fixes and enhancements for inclusion in future code releases and patches. Estimated work hours and tracked progress using Scrum methodology.

this is wordpress based CMS project here students can help people to to have knowledge latest news

3 Days

Barstone LLP — Law Firm Website

Developed a responsive and modern law firm website for Barstone LLP using React.js, TypeScript, Tailwind CSS, React Router, and Framer Motion. Implemented reusable components, responsive layouts, practice area pages, advocate profiles, sector and industry sections, insights, careers, contact sections, and interactive navigation. Built a responsive user interface with reusable UI components, smooth animations, and optimized routing. Deployed the application using Vercel and configured the project for production use.

COURSES & CERTIFICATIONS

- week long course for developing communication skills
