Awards

Outstanding Performance Award

Recognized for exceptional delivery of
frontend features using React.js and
maintaining consistent code quality.

Results-driven Frontend Developer with 4+ years of
experience building scalable, high-performance web
applications using React.js, TypeScript, and Redux.
Proficient in developing reusable component libraries,
managing complex application state, and integrating
RESTful APIs. Adept at writing clean, maintainable code
and collaborating with cross-functional teams to deliver
exceptional user experiences. Passionate about modern
JavaScript practices, performance optimisation, and
continuously improving frontend architecture.

Experience

American Epay Systems Noida
Associate Software Engineer 04/2022 - 04/2024
Project- Time Labor Management

- Developed and maintained **responsive, dynamic UI features** for a large-scale entertainment platform using **React.js, Redux, and RESTful APIs**, improving user engagement and content delivery.
- Built and integrated **reusable React components** connected to backend APIs, ensuring consistent UI across multiple modules of the entertainment application.

React.js, Redux, REST APIs, JavaScript (ES6+), Jira,
Agile/Scrum, HTML5, CSS3

American Epay Systems

Noida

Software Engineer

04/2024 – 10/2025

Project 1 – Analytics Dashboard

- Architected and developed a fully functional Analytics Dashboard from scratch using React.js, TypeScript, Redux, and Next.js – serving as the primary UI developer in a team of 3.
- Implemented Redux Toolkit for centralised state management.

Project 2 – Sales Automation Platform

- Built a Sales Automation platform from scratch using React.js, TypeScript, and Redux.
- Collaborated with a cross-functional team of 4 in Agile sprints using Jira.
- Contributed to technical planning and architecture decisions from day one.

React.js, TypeScript, Redux Toolkit, Next.js, JavaScript (ES6+), REST APIs, Agile/Scrum, Jira, React.memo.

Sofgen InfoTech

Gurgaon

Frontend Lead

11/2025 - current

Led the **UI development of a large-scale ERP system** using React.js, TypeScript, Redux Toolkit, and Next.js – handling complex modules including inventory, finance, and reporting interfaces.

- Performed **end-to-end code optimisation** across the ERP frontend – refactored legacy components, eliminated redundant renders using **React.memo and useMemo**, and improved overall application performance.
- Integrated **RESTful APIs and Redux** to manage complex ERP state including user roles, dynamic forms, and multi-level data workflows.

React.js, TypeScript, Redux Toolkit, Next.js, JavaScript (ES6+), REST APIs, Code Optimisation, Version Migration, ERPTeam Lead, Agile/Scrum.
